- 8 Distribution Centers
- Outstanding Customer Service and Support
- Now Part of SP Richards & Genuine Parts Company (\$15 Billion)

Safety Zone Distribution Centers

Disposable gloves were developed for the medical industry in late 1890's and are now widely used in food service, food processing and janitorial-sanitation, automotive service, pharmaceuticals, manufacturing. \$2.7 billion dollars of hand protection are used per year in the U.S. With a high percentage in disposable, single use gloves. 40% of american households use gloves on a regular basis and the growth is not expected to decline anytime soon. For the Safety Zone, hand protection has been our focus for 45 years so we've got you covered and will give you a hand!

## Nitrile Gloves

Nitrile is (acrylonitrile and butadiene) a synthetic rubber that has no latex in it so it's the perfect choice for the broadest range of uses. Nitrile holds up to a wide spectrum of chemicals, and is extremely strong and elastic.

Commonly used for:

- Medical
- Automotive
- Food Service
- Cleaning
- Paint

## Vinyl Gloves

Polyvinyl Chloride (PVC) known simply as vinyl gloves are a 100% synthetic polymer that offer an inexpensive option for many food service and general purpose uses.

Commonly used for:

- Industrial
- Food Service
- Cleaning
- Paint

## Latex Gloves

Latex is a natural rubber that is harvested from trees. The Goodyear Rubber Co. was asked to develop gloves for surgeons in the late 1890's. For over 100 years, latex was the first choice in gloves.

Commonly used for:

- Industrial
- Food Service
- Cleaning
- Paint

## Reusable Latex Gloves

These reusable gloves are known for dishwashing but can also be used for various chores around the house. The gloves are made from natural latex and feature a patterned grip for better handling. The gloves are sold in pairs, sizes small to large and are cotton flock-lined for added comfort.

Commonly used for:

- Industrial
- Food Service
- Cleaning
- Paint
